BRIEF ABSTRACT OF LETTER.

General and Revenue Secretariat. Seri File No. 27 of 1927.

If the Cost involved is not large, he might make an attempt to find the required money in the current year itself and start without delay the more urgent of the development measures of the Department.

Ind. M.W.K. 30/7

2. (19) In regard to para 3, I beg to suggest the following measures as calculated to stimulate extension of Sericulture

(i) Increase of seed production both in Govt. grainages and by private parties: Proposals are expected from the Dir. of Ind. regarding expansion of grainage work, and the 2nd member has indicated the manner in which the expenditure might be met. The Director may be asked to submit, in addition proposals for encouraging one or two of the young men trained in the Department to start grainages on approved lines, by promising them a subvention. In Govt.

General and Revenue Secretariat. Secr. File No. 27 of 1927

*Gramages, Seed production at present involves a loss of about 20% (excluding of establishment charges). Supposing a man were promised a loan of a microscope and equipment, and a bonus of Rs. 200/- on every lakh of lacings produced, it might be worth his while to start a grainage. The loan of instruments by ideal was offered some years back, but without effect. - - - - - - - - -

Ind. IV-R-9 9/27

3. 20(1). Increase of Seed Production

I agree with the Sec. Secretary. Private grainages are essential for expansion of work. In fact all further expansion in this direction should be by enlisting private enterprise aided by Govt. help. The aid may be made sufficiently tempting in the initial stage to induce competition to take to this profession. We may request Dir. to formulate definite proposals very early. - - - - - - - - -

Increased Seed Supply.

Put up with orders dtd 17-9-27

Subs for orders vide draft to the Director of I.P., as noticed by the Secy. in minute dt. 17.9.27.

To

The Director of I.P.

With Govt letter dt 20.7.27 requesting him to examine the question of increasing the production of silk worm seeds thoroughly & submit formal proposals for the orders of Govt.

Letter No. Dy-1318-27 from the Director of I.P. forwarding, with his own opinion, copy of Seri. Supdt's letter of 23/11/27 submitting proposals for improving supply of seed through private graineges.

7 Orders have been issued sanctioning a grant upto Rs. 11,600/- for increasing seed supply in Govt. graineges and the present proposals are calculated to augment the supply of seed in private graineges.

8 certain concessions have already been sanctioned with a view to enable private graineges being started on a large scale; but it is reported that they

To

The Director of I.T.C.

No. 6610 dt. 23/12/27

With Reference to 2(2), enquires how much the proposals would cost per year etc...

Letter no. 24-1318-27 dt. 4th January 1928 from the Dir. of I.T. forwards a copy of letter no. 3b-3089/27 from the Superintending Engr. stating that he proposes to start three aided gramjays during 1928-29 @ a cost not exceeding Rs. 25-00/- only.

14 Subs for perusal with reference to paras 9 & 11.

15: The proposals made by the Dir are in order.

Rd. 21.1.28.

The proposals as formulated by the Dir of I.T.C. may be approved.

Sd/ D)

23/1

17 Two aided gramjays may be started in 1928-29 on the following terms:

(1) Gramjays to be opened on the Mysore Road, & to produce not less than 50 000 kgms a year

General and Revenue Secretariat. Ser. File No. 27 of 1927.

Serial No.

Conform to Rules the standard prescribed in the Dept^g Ser.

(3) No limitation of price (but price fort gramayas charge 1/- per 100 layings, I doubt think the Aided Planters will be able in practice to charge more)

(4) 1 Microscope 2 ..... + pestles, 8000 cells ..., Dr Strangers (total cost Rs 530) to be lent for 1 year, on condition that they will be either returned, or returned for half price after one

(5) An outright grant of Slides, Caustic potash Formaline, (twice Rs 34)

(6) Printed books, cards, receipt books etc to be given free by the Dept.

(7) Recognition as Aided planters

(8) Dept to help in getting seed Cocoons from seed raisers if required, at market price.

(9) Bonus of Rs 5 for every 1000 layings prepared for one year (subject to continuation for another year or two if necessary)

WD 0324—GPB—60,000—24-5-27

General and Revenue Secretariat. Seri File No. 27 of 1927.

Serial No.

18

A bonus is necessary, for I doubt that an Aided planter can possibly get a better price than the Dept for the same kind of seed, and the Dept will have to continue direct sales of pure Mysore seed for some time to come. Later on, when the Dept restricts the manufacture of Mysore seed only for seed cocoon rearers, and sells only hybrid & new race eggs, it might charge a higher price - say Rs 2/- per 100 layings - & the Aided planter may well raise his price to Rs 1-8-0. Just at present, the cost of manufacture of 1000 layings, as figured out from Lalbagh books, is about Rs 15/- & the selling price being only Rs 10/- a loss of Rs 5/- is almost inevitable. This will have to be made good by the bonus. To raise the price of eggs suddenly would be a blow to the rearing industry, which would result in losing to the country for infinitely more than it would gain to the planter

General and Revenue Secretariat. Secr File No. 27 of 1927

GOVERNMENT OF MYSORE.

DEPARTMENT OF INDUSTRIES AND COMMERCE.

OFFICE OF THE DIRECTOR,

Dated Bangalore, the 27th September 1927.

1—12—

FROM

C. RANGANATHA RAO SAHIB, ESQ., B.A., B.L.,

Director of Industries and Commerce in Mysore,

(Bangalore India).

To

H. RAMA RAO, ESQ., B.A., B.L.,

SECRETARY TO THE GOVERNMENT OF MYSORE,

DEVELOPMENT DEPARTMENTS, BANGALORE.

SIR,

With reference to your letter {No. D 3014 / Seri 27-27-1, dated 20.9.27} requesting the submission of proposals in the matter of starting private grainages, I have the honor to enclose for your information copy of a letter from the Superintendent of Sericulture along with its enclosures recommending the concessions that may be granted to people to start aided grainages and the rules that may be issued on the subject.

Government have already granted certain concessions for the starting of private grainages in their Order No.7880-1/A & E.145-20-2 dated 19th February 1921. But these concessions have not been sufficiently attractive and no grainages have yet been started. It is necessary therefore that more attractive terms should be offered to induce professional seed coccon sellers to start private grainages on modern lines.

I agree with the recommendation of the Superintendent of Sericulture, in regard to the rules for the starting of private grainages but I do not consider that it is necessary that a private grainer should have studied up to the school Final standard. No Education qualification is necessary to start a grainage. It would be sufficient if the person can understand the use of a Microscope and can adopt the methods of grainage work followed in Government Farms.

In regard to the concession of a bonus of Rs.5/- for every thousand disease-free layings recommended by the Superintendent, I

think that this bonus is unnecessary provided that no limitation is imposed in regard to the rate at which disease-free layings may be sold by the private grainuor to the public.

I have the honor to be,

Sir,

Your most obedient servant,

V Kanganatha Rao Sahib

D i r e c t o r.

23rd November

D4

26/11/27

C. Ranganatha Rao Sahib, Esq., B.A., B.L.,
Director of Industries and Commerce in Mysore,
Bangalore.

With reference to your No. D4-1318-27 of 28th September 1927 forwarding to me copy of letter No. D.3014/Seri.27-27-1 dated 20th September 1927 and asking me to submit proposals in the matter of starting private grainages, I have the honour to state that Government have in their order No. 7880-1/A&E.145-20 of 19th February 192[illegible] (copy enclosed) sanctioned certain concessions for encouraging private grainages. These ~~accessories~~ concessions do not seem to have gone very far in helping the intending ~~grainages~~ graineurs. Concessions on a more liberal basis have to be given to these people as these have to compete with the professional seed cocoon sellers in silk-worm rearing centres and as the layings produced by these people have to be sold to the raiyats at the same rate as is being done in the Government Grainages. In view of the above, I propose that the concessions noted in the enclosure A may be granted to the people who start aided grainages and work the same on the conditions noted in the enclosure B, which may be kindly approved.

One of the concessions I propose to be granted is the payment of bonus of Rs 5/- for every thousand disease-free layings prepared and distributed by the party. This subsidy is necessary in view of

the fact that the cost of production of disease-free layings specially when undertaken on a small scale amounts to about Rs 1/8 per 100 layings, while he has to sell the same at Re. 1/- as is being done by Government Grainages. The graineur must be assured that he does not suffer any loss in undertaking the business. I believe this subsidy or bonus will certainly encourage him specially when he has no experience of such institutions. This bonus may either be raised or lowered as the case may be after such Institutions have worked for a couple of years. Such a bonus is being given in Japan whenever the Government wish to encourage the rearing of new races of silk-worms, growing new varieties of mulberry, etc.

The costly scientific appliances, such as microscope, pestles and mortars, tin rings, and sprayer have to be given to the people on the understanding that if after a year's work they wish to continue the grainage, they should purchase the above at half the original cost, or return the same to Government in good condition if they do not wish to continue the work. These people will have to be supplied with all the grainage books, etc., free of cost by Government and also be given a small quantity of slides, cover glasses, etc., as detailed in the enclosure A, free of cost once for all, any further supply being made to them at cost price.

I beg to state that it is necessary to depute one of the Senior Officers of the Department, not below the rank of a First Class Inspector who is well versed in grainage work to inspect the aided grainage at the time of each grainage operation, to examine a few of the moths and to certify that the layings are disease-free by affixing the seal of the Department on each egg sheet produced in this aided grainage. Just at present it may be possible to depute one of the Officers of the Department to attend to this work in addition to his other duties, but when the number of aided grainages increases, it would be necessary to have a separate Officer for this work.

I beg to report that there are two intelligent young sericul-

sericulturists who are quite willing to start aided grainages immediately, if Covernment are willing to afford the necessary facilities. The present scheme may be sanctioned for two years in the first instance from January 1928.

I beg early orders in the matter.

I have the honour to be,

Sir,

Your most obedient servant,

W. J. Lindsay

Superintendent.

Proceedings of the Government of His Highness the Maharaja of Mysore.

R e a d. -

Government Order No. 4527-37/A. A&E. 50-18-8 dated 27th November 1918 approving of certain modifications in the rules for the grant of loans for sericultural improvement in Mysore.

2. Government Order No. 2592-604/A&E.198-19-4 dated the 9th September 1920 sanctioning the grant of certain concessions for encouraging the starting of private grainages for the supply of -- disease free eggs.

3. Government Order No. 3264/77/A&E.57-18-15 dated 28th September 1920 sanctioning the reorganisation of the Sericultural Department and calling for a comprehensive scheme embodying detailed proposals for the supply of disease free eggs by private graineurs.

4. Letter No. 3683/C.591-2 of 20-21 dated 18th November 1920 from the Director of Agriculture submitting certain proposals for the organization and development of private grainages for the supply of disease free seed.

Order No. 7880-1/A&E.145-20, Dated, Bangalore the 19th February 1921.

The Director of Agriculture has at the instance of the Superintendent of Sericulture submitted for sanction the following proposals:-

I. That a special officer on Rs 70-10-100 may be appointed for the organization and inspection of private grainages.

2. That a set of grainage instruments consisting of (a) a cheap but a suitable Microscope and (b) a mortar and pestle at a total cost of Rs 150/- may be supplied to each private grainage on the understanding that if the grainage works satisfactorily for a year and if the graineur has in the mean time learnt the use of a microscope the set of instruments should be given to such graineur at half cost.

3. The loans granted to private graineurs should be free of interest for a period of five years, interest being levied at 5 percent after that period.

4. That the Director of Agriculture may be authorised to grant

which conform to Government rules framed in this behalf may be granted open recognition and termed "Aided Industrial Grainages."

The Director is requested to submit separate detailed recommendations in the matter after consultation with the Japanese Expert.

Sd/- S.N. Appannaiengar,

For Secretary to Government,
Departments of Education and Agriculture.

The Director of Agriculture in Mysore.
The Comptroller, Mysore Government through Financial Sectt.

C. 691-4 of 20-21.

Forwarded to the Superintendent of Sericulture. As usual a typed copy of this may be sent to this office for reference her

Sd/- Leslie C. Coleman.

Enclosure. A.

Concessions to be granted to private people who start Aided Grainages in the Mysore State.

****

1. The following scientific appliances will be given to each aided grainage on the understanding that if the grainage works satisfactorily for a year, the lot (A) will be given at half the original cost, this amount being paid to Government in two annual instalments and lot (B) will be treated as a free gift:-

Lot (A).

1. One microscope - Magnifying up to 600 times.	- Probable cost-		Rs 300/-.
2. Two sets of mortars and pestles.	- "	"	- Rs 100/-.
3. 8 thousand conical tin rings.	- "	"	- Rs 100/-.
4. Ordinary sprayer for disinfection-	"	"	- Rs 30/-.
			Rs 530/-.

Lot (B).

1. Glass slides(100), cover glasses (2 Oz.), and slide carriers(6).	- Cost about		- Rs 20/-
2. Caustic Potash - 1 lb.	- "	"	- Rs 2/-
3. Formaline - 6 lbs.	- "	"	- Rs 12/-.
			Rs 34/-.

2. The printed books, examination cards, receipt books, fortnightly report forms, etc., will be given free of cost up to the quantity required for the grainage.

3. Training in grainage work will be given in the nearest Government Grainage free of cost.

4. A bonus of Rs 5/- for every 1,000 disease-free layings prepared and distributed to the sericulturists, will be given to each aided grainage, the bonus being paid every six months, provided the grainage has produced and distributed the minimum quantity fixed by the Government for that period.

5. The aided grainages will be given open recognition and be termed "Aided Industrial Grainages" and will be permitted to correspond with the Officers of the Sericultural Department on purely official

official business connected with the Grainage by sending "Service Unpaid" letters, after a year's satisfactory work.

W. J. Rudduck
Superintendent of Sericulture.

Enclosure B.

Rules for the starting and the working of the aided grainage in the Mysore State.

1. The person starting the grainage must be a practical sericulturist, should have undergone training in grainage work in a Government grainage for at least three months and hold a certificate of proficiency in the grainage work.

2. He must be a person of good character and should have studied up to at least the School Final Standard.

3. The grainage must be situated in or very near a sericultural centre.

4. Should undertake to follow the instructions and rules laid down for work in the Government Grainages.

5. Should undertake to keep a record of the results of the rearings from the seed issued from the grainage.

6. Should undertake to keep regular accounts and necessary record which should be open for the Officers of the Sericultural Department and must also send periodical returns to the Senior Officer of the Department in the District.

7. Should sell the disease-free layings produced in the grainage at the same rate, i.e., Re. 1/- per 100 layings as is being done by the Government Grainages.

8. Should undertake to prepare and sell not less than 50,000 disease-free layings in a year.

9. Should undertake to give timely intimation to the Circle Officer of the Department, re' the time of each grainage operation and to issue the layings to the raiyats after the layings are inspected and passed by one of the Officers of the Sericultural Department not below the rank of a First Class Inspector, the egg sheets passed bearing the seal of the Department.

H.P. Luidens.

Superintendent of Sericulture.

Bangalore.

D.5936

SIR,

Aided Grainages.

With reference to your letter No.D.6610/Seri.27-27-3 dated 23rd December 1927 requesting me to intimate the annual cost, that the proposals submitted by me in my letter Dated 1-12-'27 would involve, I have the honour to state that the amount required for starting three aided grainages during 1928-29 would be Rs 2,500/- only. The Superintendent of Sericulture desires to show these concessions to at least six grainages which may be started during the next two years. A copy of his letter No.3630 dated 9-1-1928 is herewith submitted for the information of Government.

I have the honour to be,

S-ir

Your most obedient servant,

Director in charge

Copy of letter No.3630 dated 9th January 1928 from the Superintendent of Sericulture in Mysore, to the Director of Industries and Commerce in Mysore, Bangalore.

---:0:---

With reference to your No. D4-1318/27 of 5th instant I have the honour to state that the concessions recommended by me may be granted to at least six grainages which may be started during the next two years.

I am hopeful of having at least three such grainages started during the first year and the cost of these three grainages during 1928-29 would be as noted below:-

1. Cost of scientific appliances for 3 Grainages at Rs 530/- per grainage.	Rs 1,590-0-0
2, Cost of slides, etc., at Rs 34 per each grainage - for 3 Grainages.	Rs 102-0-0
T O T A L.	Rs 1,692-0-0

Or say Rs 1,700/- in round figures.

3. Grant of Bonus:- Assuming that each grainage produces only 50,000 layings, i.e., the minimum laid down in the rules, bonus at the rate of Rs 5/- per 1,000 layings will have to be paid on 1,50,000 layings during 1928-29. This amounts to Rs 750/- only.

The total amount required during 1928-29 for starting three aided grainages would be Rs 2,500/- only.

Proposals for subsequent years can be submitted after the above grainages have worked for a year at least.

---:0:---

" COPY "

Director.

this Govt. is against the grant of bonus. Proposal is dropped. Remarks obtained from Director. Govt. have no objection to grant bonus @ Rs 5 per 1000 layings in case of aided grainages only.

R e a d :-

Government Order No: 7880-1/ A & E 145-20-2 dated 19th February 1921 passing orders regarding the organisation and development of privat grainages for the supply of disease free eggs.

2. Correspondence ending with letter No. D4-1318-27 dated 1st ecember 1927 from the Director of Industries and Commerce forwarding, ith his remarks, copy of Sericultural Superintendent's letter dated 22 ovember 1927 submitting proposals for improving the seed supply throug rivate grainages.

O r d e r No: D. 8848-9/ Seri. 27-27-5

Bangalore, Dated 27th February 1928.

Certain concessions have already been sanctioned in the - vernment Order dated 19th February 1921 read above, with a view to a- able private grainages being started on a large scale. It is reporte at these concessions are not very attractive with the result that no ivate grainages have been started availing of those concessions. The rector of Industries and Commerce has accordingly submitted proposals : the starting of three aided grainages during the year 1928-29 at a st of Rs.2,500.

On a scrutiny of the proposals of the Superintendent of ericulture as modified by the Director of Industries and Commerce, overnment are pleased to sanction the starting of two aided grainages ubject to the conditions mentioned below :-

(i) Grainages should prepare only pure Mysore seed, and produce not less than 50,000 layings a year.

(ii) Grainages technique should conform to the standard prescribed by the Department of Sericulture.

(iii) Price charged for the disease free laying prepared at the grainage should be reasonable and left to the discretion of the graineur.

(iv) One microscope, two sets of mortars and pestles, 8000 cellules and a sprayer at a total cost of

of Rs.530/- will be lent to each grainage for one y on condition that they will be either returned or retained for half the price at the end of the year, provided the grainage is able to show satisfactory in the meanwhile.

(v) An outright grant of Rs.34/- will be given for the pu of slides, caustic potash and formaline.

(vi) Printed books, examination cards, receipt books, etc be given free of cost by the Department of Sericul up to the quantity required for the grainage.

(vii) The aided grainages will be given recognition and pe to correspond with the officers of the Sericultura Department on official business.

(viii) The Sericultural Department should render necessary getting seed coccons from seed rearers, if requir market prices.

(ix) A bonus of Rs.5/- for every 1000 disease free layin prepared and distributed should be given to each for one year in the first instance.

The cost of the scheme is as indicated in the

1. Cost of scientific appliances for two grainages at Rs.530 per grainage	1,060/-
2. Cost of slides, etc., at Rs.34/- per grainage for two grainages	68/-
3. Bonus to the two graineurs assuming that each grainage produces only 50,000 disease free layings.	500/-
Total.	1,628/-
or roughly	1,650/-

requested to take necessary action for starting these grainag immediately, the cost during the current year being met by reapp tion from sanctioned grants of the Sericultural Department.

As regards funds required for this purpose during the ne year, the necessary provision may be made in the budget for 192
